

## Contents

### Mechanical Sensors

Tactile image detection using a 1k-element silicon pressure sensor array ..... 397  
S. Sugiyama, K. Kawahata, M. Yoneda and I. Igarashi (Aichi-ken, Japan)

New magnetoelastic force sensor using amorphous alloys ..... 401  
J. Seekircher and B. Hoffmann (Karlsruhe, F.R.G.)

New piezoelectric transducers for internal strain measurement ..... 406  
C. Cavalloni and P. Engeler (Winterthur, Switzerland)

Integrated stylus-force gauge ..... 410  
Y.-C. Tai and R. S. Muller (Berkeley, CA, U.S.A.)

An angle-of-rotation sensor using flip-flop photodetecting techniques ..... 414  
P. J. French, H. Muro, Y. Hiramoto (Yokosuka, Japan) and W. Lian (Delft, The Netherlands)

An electronic wind meter based on a silicon flow sensor ..... 420  
B. W. van Oudheusden and J. H. Huijsing (Delft, The Netherlands)

High-sensitivity 2-D flow sensor with an etched thermal isolation structure ..... 425  
B. W. van Oudheusden and A. W. van Herwaarden (Delft, The Netherlands)

Liquid transport in micron and submicron channels ..... 431  
J. Pfahler, J. Harley, H. Bau and J. Zemel (Philadelphia, PA, U.S.A.)

Fiber-optic position sensor ..... 435  
Y. Takamatsu, K. Tomita, J. Takagi and T. Yamashita (Kyoto, Japan)

Fiber-optic dual-coil sensor for simultaneous measurements of mechanical displacement and temperature change ..... 438  
K. Oka, T. Takeda and Y. Ohtsuka (Hokkaido, Japan)

Microdisplacement sensor using a polarization-maintaining optical fiber ..... 442  
H. Kitajima, J. Takagi and T. Yamashita (Kyoto, Japan)

High-resolution optical displacement pickup operable at 175 °C ..... 445  
K. Nishida and M. Kondo (Kanagawa-ken, Japan)

### Radiant Sensors

High-density Schottky-barrier infrared image sensor ..... 451  
M. Kimata, M. Denda and N. Tsubouchi (Hyogo, Japan)

A retinal CCD sensor for fast 2D shape recognition and tracking ..... 456  
I. Debusschere, E. Bronckaers, C. Claeys (Leuven, Belgium), G. Kreider, J. Van der Spiegel (Philadelphia, PA, U.S.A.), G. Sandini (Genoa, Italy), P. Dario, F. Fantini (Pisa, Italy), P. Bellutti and G. Soncini (Trento, Italy)

Monolithic heteroepitaxial infrared sensor arrays on Si for thermal imaging applications ..... 461  
J. Masek, C. Maissen, H. Zogg and S. Blunier (Zurich, Switzerland)

Basic characteristics of an infrared CCD with a pyroelectric gate ..... 465  
M. Okuyuma, Y. Togami, H. Taniguchi, Y. Hamakawa (Osaka, Japan), M. Kimita and M. Denda (Hyogo, Japan)

A new type of photosensitive capacitor with MPNIM structure ..... 469  
Zhu Changchun and Liu Junhua (Xi'an, China)

A thin-film bolometer for radiation thermometry at ambient temperature ..... 473  
W. Lang, K. Kühl (Munich, F.R.G.) and E. Obermeier (Berlin, F.R.G.)

Low-temperature operating silicon bolometers for nuclear radiation detection . . . . .	478
G.-A. Racine, R. A. Buser, N. F. de Rooij (Neuchâtel, Switzerland), G. Stucki, R. Stucki and K. Pretzl (Berne, Switzerland)	
High-purity silicon soft X-ray imaging sensor array . . . . .	482
S. A. Audet, E. M. Schooneveld, S. E. Wouters and M. H. Kim (Delft, The Netherlands)	
Silicon nuclear radiation detectors of a-Si:H/c-Si heterojunction structure with sensitive large area or array area . . . . .	487
M. Yabe (Tokyo, Japan) and N. Sato (Kanagawa, Japan)	
A highly-sensitive silicon microphotosensor . . . . .	494
He Mincai, Chen Bingruo and Huang Qijun (Hubei, China)	
Metallic thin-film diffraction grating as a new type of radiation detector . . . . .	498
V. I. Konov, P. I. Nikitin, D. G. Satjukov and S. A. Uglov (Moscow, U.S.S.R.)	
Pyroelectric infrared sensor arrays based on the polymer PVDF . . . . .	503
G. Mader and H. Meixner (Munich, F.R.G.)	
Pyroelectric infrared array sensors made of <i>c</i> -axis-oriented La-modified PbTiO <sub>3</sub> thin films . . .	508
R. Takayama, Y. Tomita, J. Asayama, K. Nomura and H. Ogawa (Osaka, Japan)	
Compatible integration of radiation detectors and transistors . . . . .	513
S. E. Wouters, S. A. Audet and M. H. Kim (Delft, The Netherlands)	
Contactless lifetime measurement in processed and preprocessed high-purity silicon radiation sensors . . . . .	517
T. Otaredian and S. A. Audet (Delft, The Netherlands)	
High-resolution reflective photointerrupter . . . . .	522
M. Takeuchi, N. Atarashi, Y. Ito and M. Shimura (Kyoto, Japan)	
In-process inspection of IC under packaging by single laser beam and photosensors . . . . .	525
I. Kimura (Saga-shi, Japan)	
An array-type PSD (position-sensitive detector) for light pattern measurement . . . . .	529
A. Kawasaki, M. Goto, H. Yashiro and H. Ozaki (Kawasaki, Japan)	
On the position response of a position-sensitive detector (PSD) irradiated with multiple light beams . . . . .	534
A. Kawasaki and M. Goto (Kawasaki, Japan)	
A linear high-performance PSD displacement transducer with microcontroller interfacing . . .	538
G. C. M. Meijer and R. Schrier (Delft, The Netherlands)	
An integrated position sensor using JFETs as a buffer for PSD output signal . . . . .	544
H. Muro and P. J. French (Yokosuka, Japan)	
A silicon ultraviolet detector . . . . .	553
R. S. Popović, K. Solt, U. Falk and Z. Stoessel (Zug, Switzerland)	
Photodiodes in silicon with an electrically-programmable UV response . . . . .	559
R. F. Wolffentbuttel (Delft, The Netherlands)	
Optimizing the performance of spectrally selective photodiodes by simulated annealing techniques . . . . .	564
A. S. Glass (Zug, Switzerland) and R. Morf (Zurich, Switzerland)	
Planar epitaxial avalanche photodiodes with enhanced blue sensitivity for scintillation detectors . . . . .	570
O. Boslau and W. von Münch (Stuttgart, F.R.G.)	
Performance of an integrated silicon colour sensor with a digital output in terms of response to colours in the colour triangle . . . . .	574
R. F. Wolffentbuttel and G. de Graaf (Delft, The Netherlands)	
A new transducer for color distinction . . . . .	581
H. Kato, M. Kojima (Nagoya-shi, Japan), A. Kondo, N. Morishita and Y. Inagaki (Gifu-shi, Japan)	

### Interfaces

A scaled electronically-configurable multichannel recording array . . . . .	589
J. Ji, K. Najafi and K. D. Wise (Ann Arbor, MI, U.S.A.)	
Sensor array with A/D conversion based on flip-flops . . . . .	592
W. Lian, S. E. Wouters, D. A. Aupers and P. M. Sarro (Delft, The Netherlands)	
Variable spatial filtering detector with high rate of weighting function change . . . . .	598
S. Inagaki (Kanagawa, Japan), T. Yamaura and A. Kobayashi (Tokyo, Japan)	
Analog circuit for interfacing silicon optical sensors and driving a dual-slope A/D converter for logarithmic read-out . . . . .	603
R. F. Wolffenbuttel (Delft, The Netherlands)	
Self-adapting multiple microphone system . . . . .	610
K. Takahashi and H. Yamasaki (Tokyo, Japan)	
Dynamic calibration of sensors using EEPROMs . . . . .	615
P. P. L. Regtien and P. J. Trimp (Delft, The Netherlands)	

### Thermal Sensors

Integrated thermopile sensors . . . . .	621
A. W. van Herwaarden, D. C. van Duyn, B. W. van Oudheusden and P. M. Sarro (Delft, The Netherlands)	
Cu/Pd thin-film thermopile as a temperature and hydrogen sensor . . . . .	631
M. Baciocchi, A. Bearzotti, M. Gentili, A. Lucchesini, C. Caliendo, E. Verona and A. D'Amico (Rome, Italy)	
Smart temperature sensor in CMOS technology . . . . .	636
P. Krummenacher and H. Oguey (Neuchâtel, Switzerland)	
Bipolar-process-compatible lateral-field silicon temperature sensor with charge injection . . . . .	639
R. F. Wolffenbuttel (Delft, The Netherlands)	
Design of a CMOS temperature sensor with current output . . . . .	645
A. Kölling, F. Bak, P. Bergveld and E. Seevinck (Enschede, The Netherlands)	
High-resolution thin-film temperature sensor arrays for medical applications . . . . .	650
G. Urban, A. Jachimowicz, F. Kohl, H. Kuttner, F. Olcaytug, H. Kamper, F. Pittner, E. Mann-Buxbaum, T. Schalkhammer, O. Prohaska and M. Schönauer (Vienna, Austria)	
A new class of integrated thermal oscillators with duty-cycle output for application in thermal sensors . . . . .	655
Y. Pan, F. R. Riedijk and J. H. Huijsing (Delft, The Netherlands)	
Temperature monitoring for prevention of pressure sores . . . . .	660
T. Tamura, J. Zhou and T. Togawa (Tokyo, Japan)	
Ultrasonic distributed temperature sensor . . . . .	663
W. K. Kulczyk, G. W. Smith and G. A. Jackson (Enfield, U.K.)	
A SAW delay-line oscillator as a high-resolution temperature sensor . . . . .	670
J. Neumeister, R. Thum and E. Lüder (Stuttgart, F.R.G.)	

### Ultrasonic Sensors

A novel junction surface acoustic wave detector in silicon . . . . .	675
J. C. Haartsen and A. Venema (Delft, The Netherlands)	
Improvement of integrated ultrasonic transducer sensitivity . . . . .	679
J.-H. Mo, A. L. Robinson, F. L. Terry, Jr., D. W. Fitting and P. L. Carson (Ann Arbor, MI, U.S.A.)	
B-mode imaging using Si ultrasonic image sensor . . . . .	683
K. Higuchi, K. Suzuki, H. Tanigawa, T. Horiguchi and N. Takanashi (Kanagawa, Japan)	

Sandwich-layer transducer – a versatile design for ultrasonic transducers operating in air . . . . .	687
T. Möckl, V. Mäggi and C. Eccardt (Munich, F.R.G.)	
Liquid–solid phase transition detection with acoustic plate mode sensors: application to icing of surfaces . . . . .	693
R. C. Hughes, S. J. Martin, G. C. Frye and A. J. Ricco (Albuquerque, NM, U.S.A.)	
Flexural plate-wave gravimetric chemical sensor . . . . .	700
S. W. Wenzel and R. M. White (Berkeley, CA, U.S.A.)	
Viscosity and density sensing with ultrasonic plate waves . . . . .	704
B. A. Martin, S. W. Wenzel and R. M. White (Berkeley, CA, U.S.A.)	
A theoretical approach for a low diffraction ultrasonic transducer . . . . .	709
C. Martin, J. Y. Chapelon and D. Cathignol (Lyon, France)	
Monitoring photo-polymerization of thin films using SH acoustic plate mode sensors . . . . .	712
S. J. Martin and A. J. Ricco (Albuquerque, NM, U.S.A.)	
A P(VDF–TrFE)-based integrated ultrasonic transducer . . . . .	719
A. S. Fiorillo, J. Van der Spiegel, P. E. Bloomfield and D. Esmail-Zandi (Philadelphia, PA, U.S.A.)	
Optical beam deflector using a piezoelectric bimorph actuator . . . . .	726
T. Ono (Kawasaki, Japan)	
Piezo film: form and function . . . . .	729
R. H. Brown (Dunfermline, U.K.)	

### Magnetic Sensors

Differential Hall IC for gear-tooth sensing . . . . .	737
H. Jasberg (Munich, F.R.G.)	
A low-offset spinning-current Hall plate . . . . .	743
P. J. A. Munter (Delft, The Netherlands)	
Monolithic silicon magnetic compass . . . . .	747
K. Maenaka, M. Tsukahara and T. Nakamura (Toyohashi, Japan)	
A symmetrical vertical Hall-effect device . . . . .	751
U. Falk (Zug, Switzerland)	
On-chip metal deformation measurements: a magnetic approach . . . . .	754
A. Bossche and J. R. Mollinger (Delft, The Netherlands)	
Rotation of base region Hall field in magnetotransistors . . . . .	758
A. Nathan and H. P. Baltes (Zurich, Switzerland)	
Integrated magnetic sensors . . . . .	762
T. Nakamura and K. Maenaka (Toyohashi, Japan)	
3-D magnetic field sensor realized as a lateral magnetotransistor in CMOS technology . . . . .	770
Lj. Ristić, M. T. Doan and M. Paranjape (Edmonton, Alta., Canada)	
Low-frequency noise in modulation-doped AlAs/GaAs superlattice dual-drain magnetic sensors . . . . .	776
A. Nathan, H. P. Baltes, R. Castagnetti (Zurich, Switzerland), Y. Sugiyama (Tsukuba, Japan) and D. R. Briglio (Edmonton, Alta., Canada)	
Integrated silicon magnetotransistors: high sensitivity or high resolution? . . . . .	780
A. Nathan and H. P. Baltes (Zurich, Switzerland)	
A novel integrated 3-D DMOS magnetic vector sensor based on BCD technology . . . . .	786
Lai Zongsheng, Liu Yi, Wu Guangli and Jiang Hao (Shanghai, China)	
Comparison of noise properties of different magnetic-field semiconductor integrated sensors .	790
A. Chovet (Grenoble, France), Ch. S. Roumenin (Sofia, Bulgaria), G. Dimopoulos and N. Mathieu (Grenoble, France)	

A thin-film magnetoresistive angle detector .....	795
K. J. M. Eijkel, J. W. Wieberdink, J. H. J. Fluitman, T. J. A. Popma, P. Groot and H. Leeuwis (Enschede, The Netherlands)	
Fluxgate sensor in planar microtechnology .....	799
T. Seitz (Zug, Switzerland)	
Revolution counter using magnetic bubble device for multi-turn absolute encoder .....	803
F. Kohsaka, T. Iino, Y. Kudou, Y. Sakamaki and T. Ueda (Tokyo, Japan)	
Universal magneto-operational amplifier (MOP) .....	807
K. Maenaka, H. Okada and T. Nakamura (Toyahashi, Japan)	
Hybrid magneto-temperature sensor using contacts on a $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ superconductor .....	812
T. Aoyama, S. Miyake, T. Kusaka, Y. Suzuki, T. Yotsuya and S. Ogawa (Osaka, Japan)
